
The ASHVINS Group has signed an agreement with a leading company that manufactures and markets insulin pump technology for diabetics. The role of **The ASHVINS Group** is to develop data management software that will provide a unique expansion to their Insulin Management System.

PRESS RELEASE

Application Development Agreement; June 2008

The ASHVINS Group, Inc.; Technology Professionals

<http://www.ashvinsgroup.com>

MIAMI FL. USA – June 30, 2008. Jim Berlin, Business Development Director of **The ASHVINS Group**, Inc., an Information Technology consulting firm focused in medical and life science industries, announced that the company has signed a Development Agreement with a leading Insulin Pump Technology Company for application development services.

The project objective is to provide insulin pump users with PC and web based technology that will allow them to track, trend, monitor and share critical diabetes related data available to them in their pump. "The Insulin Pump Company is an innovative organization with advanced technology and a unique approach that is unlike conventional pump therapy. We are proud to be selected to partner with them in the area of data management and look forward to working with them to create an easy to use, exceptional application." said Lynn Hilt, President and CEO of **ASHVINS Group**, Inc. Working with the Insulin Pump Company, **Ashvins Group** will develop an overall data management system that is designed to conveniently interface the user's insulin pump and PC in order to allow patients to better manage their diabetes. The data can also be shared with Healthcare Providers (HCPs) to facilitate remote monitoring, disease management and increased communication between patients and HCPs.

ABOUT THE ASHVINS GROUP

The ASHVINS Group is a full application lifecycle development organization that provides technology services to global healthcare organizations including companies such as Baxter, Abbott Laboratories, Smiths Medical, Beckman Coulter, Thermo-Fisher, Insulet and Siemens Medical, in addition to the US Federal Government. A variety of IT skills are available from The Ashvins Group to support application development, validation and/or implementation. Professional skills include Project Management, System/Process Engineers, Software Developers, Software Quality Assurance Specialists and Documentation Specialists. The blend of healthcare and clinical experience combined with IT related processes/systems expertise makes The Ashvins Group a valuable partner who can deliver results and assist in identifying enabling technology that will enhance business capabilities and value. Areas of technical expertise include web based systems, Windows operating environments and wireless technologies.
