

The ASHVINS Group presents a seminar on "Defining Business, Functional and Technical Requirements to Support Selection and Implementation of an Electronic Medical Records System (EMR)" at a meeting associated with the annual exhibit of Towards the Electronic Patient Records (TEPR Conference), May 2008.

### **PRESS RELEASE**

TEPR Associated Seminar; "Defining Business, Functional and Technical Requirements to Support Selection and Implementation of an Electronic Medical Records System (EMR)"  
Presented May 2008 by **The ASHVINS Group, Inc.**; Technology Professionals  
<http://www.ashvinsgroup.com>

MIAMI FL. USA – May 21, 2008. Lynn Hilt, President and CEO of **The ASHVINS Group, Inc.**, an Information Technology consulting firm focused in medical and life science industries, presented a seminar on "Defining Business, Functional and Technical Requirements to Support Selection and Implementation of an Electronic Medical Records System (EMR)"

The Ashvins Group recommends a "*Solution Envisioning Approach*" combined with best practice *Requirements Engineering* principles and *Solution Evaluation* techniques that will define business, functional and technical requirements to support selection and implementation of an Electronic Medical Records System. The nature of Solution Envisioning is to facilitate a series of collaborative interactions or workshops. The sessions are structured to make it possible for a broad set of stakeholders to forge a shared understanding regarding the intent of the EMR initiative and the details of the solution vision. Having all parties understand the shared vision of the EMR system and careful documentation of prioritized system/business process requirements will assure the exploration of EMR alternatives proceeds with the confidence that there is a framework for evaluating proposed EMR options.

### **ABOUT ASHVINS GROUP**

**The ASHVINS Group** is a full application lifecycle development organization (in business since 2000) that provides technology services to global healthcare organizations including companies such as Baxter, Abbott Laboratories, Smiths Medical, Beckman Coulter, Insulet, Thermo-Fisher, Allergan and Siemens Medical. A variety of IT skills are available from The Ashvins Group to round out an application development or implementation Project Team. Skill sets include Project Management, System/Process Engineers, Software Developers, Software Quality Assurance Specialists and Documentation Specialists. The blend of healthcare experience combined with IT related processes/systems expertise makes The Ashvins Group a valuable partner who can deliver results and assist in identifying enabling technology that will enhance business capabilities and value. Areas of technical expertise include web based systems, Windows operating environments and wireless technologies.
